AGAINST FREE SILVER

Unlimited Coinage Would Make America the Dunping Ground. At the lown Republican convention held at Des Moines on July 10, the Hon. Joseph R. Lane, temporary chairman, made the following reference to the sil-

Silver being necessary in the money of the world, we must either maintain its coinage at par by legislative limitation of the amount or change the coinage ratio of the basis of its market valne. Under the policy of legislative limitation of the amount, aided by redempbeen able to train at par our silver enormous output of gold last year. It was the largest in the world's history report to the secretary of the navy re- coin, although its intrinsic value is and amounted to \$181,500,000. The much less. This policy was satisfactory dence of the general superiority of the so long as the price of silver continued \$232,785,000, and that of silver to \$135,389,000, making the largest yearaccount of overproduction and other causes, there and up a demand by the producers of the refer special silver legislation. This claim has now crystallixed into a demand for free and unlim-

operation on board the cruiser Blake, In my judgment such a policy will the crack ship of the British navy at | make America the dumping ground of means the degradation of our dollar to chasing power and be as good as the best purchasing dollar in the world. Upon a sound currency depends to a large extent the development, the prosperity, the success and the maintenance of our

DEMANDS OF SILVERITES.

One of the claims made by the advocates of silver is that the government posited in the mint the owner receives nine-tenths fine. The government stamp It simply certifies to that value and use. Everywhere in the world gold thus coined is worth \$1. If you go to Europe, the little piece of golf is worth \$1. If your house barns down, the little lump of gold that was worth \$1 previous to the fire will be worth \$1 at any

jeweler's anywhere. The advocates of free silver do not take it to the mint and have the government stamp 37114 grains, with the necessary alloy, as a dollar of equal legal tender with the gold dollar when today the value of the bullion in the the extent of 47 cents, shall be put on every 53 cents' worth of silver they take to the mint. Say the house burns again. The piece of silver worth \$1 the night before because of the stamp only is only worth 53 cents when taken to the jew-

Don't you see that the silver people are asking more from the government for silver than was ever granted by any government in the world for gold? One metal stamped \$1 because of its value the world over; the other stamped If we are to have flat money, why not have it all flat, and not 47 cents flat? If we are to have flat money, let it be paper. But the silver people claim that 53 cents for 371 1/2 grains to 100 cents for the same amount. Do you believe it? Some people are almost willing to believe that the moon is made of green

cheese. - Humboldt (Tenn.) Messenger.

SILVER AND PRICES.

Commodities Have Fallen Twenty Per Cent. Silver Has Reduced One-balf. In his speech at Gainesville, Ga., on July 23, the Hon. Hoke Smith said: The claim, therefore, that the money of final payment has been reduced onehalf, thereby depriving the public of a sufficient volume, is simply groundless. We still use gold and silver both and have more than we ever had prior to the passage of the act of 1873. The claim also that the currency has contracted, thereby appreciating the value of gold, is shown to be false by the world's coinage of gold in 1893 rose to

ly coinage in the world's history, with ver, today is, by the largest statistics, \$8,965,900,000 gold and \$3,435,500,000 silver, and it must not be forgotten that even though the gold standard may be in force, the silver coined furnishes money for final redemption to relieve the presente upon gold, just as if it had been coined upon a free coinage plan The claim that gold has appreciated, thereby depreciating the value of products, is based upon the theory that the lecrease in the value of silver and in the value of products has been contemporaneous. A careful examination of the facts shows this not to be true. The average decrease of commodities since 1873 has been about 20 per cent. The heaviest decline has been in the line of those things which the masses of the people buy. All these reductions in prices are partly attributed to a lessened cost of production and partly to the recent panic. While the commodities have fallen 20 per cent silver has fallen 50

But to consider particular articles: In 873 corn sold for 41 cents a bushel; sil ver was worth \$1.31 an cunce. FOR STACKING HAY.

One of the Rest and Cheapest Derricks Ever Devised. One of the best and cheapest derricks for stacking hay out-of-doors consists simply of one straight pole 40 feet high, secured in an upright position by means of four guy ropes each about 80 feet long. Place the pole in a somewhat slanting position so that the top will be directly over the center of the

FOR STACKING HAY.

stack. For instance if the stack is to be 18 feet square, the bottom of the pole will-be placed on the outside of this square, with the top directly over the 2x6 feet, on the bottom of the pole with wire rings in each end by means of which it can be staked firmly to the ground. The four guy ropes are fastened to the top of the pole and to the ground by means of a stake. The pulleys and hay forks are attached much the same as in a barn and are operated similarly.

For making the pole, I use two tele graph poles, one 20 feet, the other 24 feet, and spilce them firmly together. For guy ropes, take 6 or 7 strands of in addition you will need the hay fork Several of my neighbors have used it high can easily be built. The higher the pole the easier for the man on the stack - Farm and Home.
